and 2023, our  
Membership  
increased by **400%**

## 20 YEARS WITH BEFS

For BEFS, supporting and building sector capacity over the past 20 years has been a stimulating endeavour. From engaging and collaborating with so many professions across different sectors in Scotland, to continually championing the places and people that make up our unique and world-renowned built environment. Our focus has always been, and remains, policy and strategy for the sector. Looking to the horizon, and ensuring we know where the sector needs to steer – taking advantage of fair winds, and collectively bracing for the storms.

In 2018 BEFS policy role became full-time – significantly increasing our activity and output for the sector. This capacity has enabled BEFS to work with the sector –

taking on significant projects and partnerships, to better understand portfolios and what they deliver for Scotland.

2023 is a special year –

after 20 years we've received some additional funding from the Heritage Fund to examine how we do, what we do.

Thinking about what BEFS model can – and should – look like for the future. We look forward to forming this with our Members and Associates – making sure BEFS is fit for the future, continually meeting sector need. Since 2003 the remit of built environment has shifted. Social movements have brought new perspectives to the fore. Covid changed our understanding of place interactions. Thinking around the climate has coalesced into national and supra national asks and terms. The economy and how and where we spend money has changed – from online expansion, to cost of living crises. Our work now encompasses far more than the bricks and mortar (or lime and sandstone) our originators may have imagined, but BEFS continues to support Members, Associates, and the wider sector. Informing, debating and advocating for the role our existing environment can, and does play in a sustainable future.

BUILT ENVIRONMENT FORUM SCOTLAND

## 2023

- **40 Members and Associates!**
- BEFS *Fit for the Future* award
- **SIT** launch
- OPOF (*Our Past, Our Future*) launch

As the strategic intermediary body working across policy and strategy for Scotland's built environment sector, BEFS draws together extensive expertise and knowledge on Scotland's existing built environment. BEFS Members and Associates reflect the breadth of places, professions, and passions across the sector.

Thank you for sharing **20**  
years with us!
